EDUCATION

Johns Hopkins University, Baltimore, MD May 2027
Master of Science in Engineering, Data Science

University of California, Los Angeles (UCLA), Los Angeles, CA June 2025
Bachelor of Science, Data Theory, GPA: 3.3

- Relevant Coursework: Python, R programming, SQL, Data Analysis, Experimental Design, Computational Statistics, Machine Learning, Optimization

Break Through Tech at Cornell University, New York, NY Aug 2024
Certificate in Machine Learning Foundations (eCornell)

- Relevant coursework: AI, Computer Vision, NLPs, LLMs

CAMPUS INVOLVEMENT / EXTRACURRICULAR ACTIVITIES

National Student Data Corps @ UCLA, Los Angeles, CA Jan 2024 – June 2024
Project Lead

- **Led** 5 teammates to complete the credit score and the heart disease classification project using Python
- **Managed** data understanding, feature engineering, modeling, and model evaluation in both projects by Trello

DataRes @UCLA, Los Angeles, CA Jan 2024 – June 2024
Data Journalist

- **Proposed** research questions on LACrime and California K-12 disciplinary dataset from Kaggle in a team of 5
- **Extracted** insights using Python (Seaborn, Matplotlib, Pandas), **presented** my findings to other club members, and **published** 2 journal medium articles to explain my findings

PROJECTS

Steam Game Review Analysis, Los Angeles, CA March 2025 - May 2025

- Developed an **automated pipeline** to retrieve and analyze data for any Steam game using its game ID
- **Scraped** and aggregated user reviews from the Steam platform using BeautifulSoup
- Fine-tuned **GPT-2, BERT, and DistilBERT** model to perform emotion classification on player reviews, identifying the top 3 emotions prevalent across all reviews for each game

Equitable AI Dermatology: Image Classification Competition, Los Angeles, CA Feb 2025 - March 2025

- Applied image preprocessing techniques and utilized a pre-trained EfficientNetB2 model (TensorFlow) to classify 21 skin disease categories from a limited dataset
- Achieved 66% overall accuracy and ranked 2nd among all participating UCLA teams in the classification task

WORK EXPERIENCE

Accenture @ Break Through Tech, Los Angeles, CA Aug 2024 – Dec 2024
AI Studio Program Intern

- **Developed** a Technology News Insight Engine to uncover industry trends from various technology articles, supporting business development for tech startup clients
- **Automated** text mining and article categorization pipelines using NLP techniques, Groq API, and BERTopic for efficient data processing
- **Designed** an interactive recommendation system leveraging Retrieval-Augmented Generation (RAG) to answer client queries

Mt San Antonio College, Walnut, CA June 2022 - Aug 2022
Research Assistant

- **Assisted** integrating a health watch with their Institute of Future Health platform
- **Analyzed** the watch's data collection accuracy through data visualization in Python
- **Demonstrated** minimal differences between watch data and medical devices by statistical metrics

SKILLS

- Programming: Python, R, SQL, HTML, CSS, JavaScript
- ML/Cloud: TensorFlow, PyTorch, AWS, Azure
- Tools: Git, GitHub, Google Suite, Microsoft Office, Trello
- Languages: Mandarin (Fluent), Cantonese (Fluent)
